# eDub Conversions

## VW T2 Electric Camper Vans

### Since 2013, eDub have been perfecting a bolt-on, electric conversion for classic camper vans.

Working closely with the DVLA's guidelines, and with suppliers providing the latest technology, eDub bring classic campers into the 21st century with complete electric conversion systems that rival modern EVs. eDub's conversions are upgradable, so if new technology becomes available, we can change that section. Rapid charging is available on our higher voltage packs so you can top up in as little as 25 minutes.

At eDub, we Project Manage the entire conversion. Maybe you already have a camper van you'd like to convert. Maybe you have your eye on a particular one which we could source; that's no problem. We can create a traditional camper interior, with full width or 3/4 beds. Batteries are stored out of view in the engine bay or underneath the vehicle, so aesthetics are fully customisable. The Microbus layout is also possible, or even allowing wheelchair access. **Let us know your ideals and we'll take it from there.**

The petrol tank is replaced with a vast array of electrical components, including a charger, a DC/DC converter, junction boxes and Battery Management Systems. Behind the petrol flap, now sits a CCS2 charging socket. So plug in!

## Practical Design

- |                                  |                             |                             |                              |
|----------------------------------|-----------------------------|-----------------------------|------------------------------|
| 1 CCS Rapid Charging at 70kW     | 5 Regenerative Braking      | 9 Bespoke Interior          | 13 No gearstick              |
| 2 7kW Type 2 charging            | 6 Up to 63kWh Battery pack  | 10 Up to 180 miles range    | 14 Optional HVAC System      |
| 3 Derated 270BHP Motor           | 7 Battery Management System | 11 Original Classic Vehicle | 15 Drive-by-wire Accelerator |
| 4 Single Speed Reduction Gearbox | 8 Thermal Management System | 12 Optional Power Steering  | 16 Optional LED Headlights   |

### Technically Speaking

Lithium Ion Cells are arranged in bespoke battery packs. Concealed within the vehicle creating a better weight distribution than there was originally. Containing an advanced Battery and Thermal Management System; ensuring the batteries last many years. A single-speed reduction gearbox and a derated 270BHP motor create instant power and smooth driving.

### Freedom from Fuel

A Fully Electric conversion means no more fuel costs. Electricity can be up to 6 x cheaper than petrol.

### Freedom from Breakdowns

With less moving parts, an eDub conversion has less to go wrong. So go further than ever before with less worry.

### Freedom from Sluggishness

Don't fear the upcoming hill: An eDub Conversion has more power, so conquering the countryside is easy.

### Freedom from Repairs

Apart from wiper fluid, there's nothing to top up. So put your mind at ease, get an eDub conversion.

### Freedom from Restrictions

Congestion charges are restricting old vehicles, don't get caught out. Make the change.

Receiving a Converted Classic Camper; "It's like Christmas!"  
**eDub Conversions Customer**

### We take care of everything

You can Experience an Electric Classic Camper in 4 different ways. **Purchase;** where we source a classic camper and convert it with one of our pack. **Convert;** where you supply the camper. **Franchise;** where you host an eDub for a season to offer for holidays, or **Hire;** where you can take family and friends away for an adventure over a long weekend.

### More than just Campers

We can convert anything, specifically classic vehicles pre-2000. We use the same components, and our field experts design and fabricate the perfect way to integrate into the vehicle. Contact our Award Winning Team.
